Minimal maintenance ... maximum results!

FlexiFlor Sheet Rubber Flooring provides a virtually continuous surface which dramatically reduces the number of dirt-catching seams. It can even be "flash covered," or turned up on the wall to eliminate a wall/base seam. A "green" product with low outgassing, FlexiFlor releases no harmful VOC's into the environment and requires just mild detergent and bleach (if desired) for cleaning. Needing no special waxes, sealers, dressings or other finishes, FlexiFlor maintains its superior sheen with only an occasional buffing!

Available in over 100 colors in smooth or hammered finish!

Advantages of FlexiFlor Sheet Rubber

- Superior resilience and endurance.
- Excellent dimensional stability. Will not shrink like vinyl.
- Minimal maintenance. Just clean and buff as needed.
- Excellent underfoot comfort.
- Withstands grueling use, yet looks good for years.
- Superior scuff and stain resistance.
- Firm, non-slip footing.
- Spill proof – liquids easily wipe clean.
- Top-to-bottom integral color wear surface.
- **No applied sealers or finishes**
